

GRINDING DEPARTMENT

Grinding of:

- plane rollers
 - bombarded rollers
- up to 5 metres length on a CNC-controlled grinding machine.

Grinding of:

- Optiroll rollers
- Sanding rollers
- Forwarding rollers
- Adhesive rollers

New EPDM rubber quality with springback effect, which reduces pressure marks as well as the roller changing considerably.

Make use of our experience regarding choice of shore and profiling of glue rollers in order that the correct amount is applied in the most optimal way.

Rollers are registered with a number on the shaft end, thus the history may be followed.
