

EPI ADHESIVE MIXER

Type LMX E

- The EPI adhesive mixer is used for dynamic mixing of 2-component EPI glue.
- Pump unit for glue with fixed rotation, mounted with pre-filter house.
- Pump unit for hardener agent with variable rotation ensures correct adjustment of mixing proportion. It is mounted with a stainless steel strainer fitting.
- Flow sensors detect lack of glue or hardener. Flowmeter for measurement of glue/hardener amount. (Optional equipment)
- The funnel is Teflon coated and is easy to dismount for cleaning together with the mixer disc.
- The EPI adhesive mixer has manual or automatic operation.
- D38 mm suction hose with cam coupling connection to standard container.

Type	Output	RPM	Volume	Connection
Glue pump	0.37 kW	29	2.5 l/min.	1½" RG
Hardener pump	0.37 kW	6-33	0.25-1 l/min.	
Mixer motor	0.12 kW	700
